Small figure, light weight

The backpack is made of your high-density 100% nylon fabric, flannel lining and high-density pearl sponge partition, allowing you to travel light.

Back belt and back sponge pad

- The sponge cushion on the back is made of honeycomb-like three-layer mesh fabric with strong air permeability, which plays a very good role in heat dissipation and perspiration.

- According to the design of human back structure, the shoulder adopts anti-seismic and sweat guiding principles. Strap adopts Integrated Design

The music playing breathable back width designed based on human exercise mode has the functions of comfort, fit, reducing shoulder and back pressure, and is suitable for outdoor use for a long time.

Quickly pick up the machine and be afraid of beautiful things

PRODUCT DISPLAY

Exquisite two-way safety buckle can reduce back pressure while locking the Love Machine.

Shaking needle reinforcement system, fine and even routing, reinforcement without losing beauty at the same time.

Atmospheric leather LOGO. Highlight brand value

Fine edging technology, meticulous workmanship can effectively reduce the wear of the backpack and prolong the service life

Double-row quick zipper, large pull-down opening opening, bilateral quick zipper, easy to take out the camera quickly and capture beautiful things

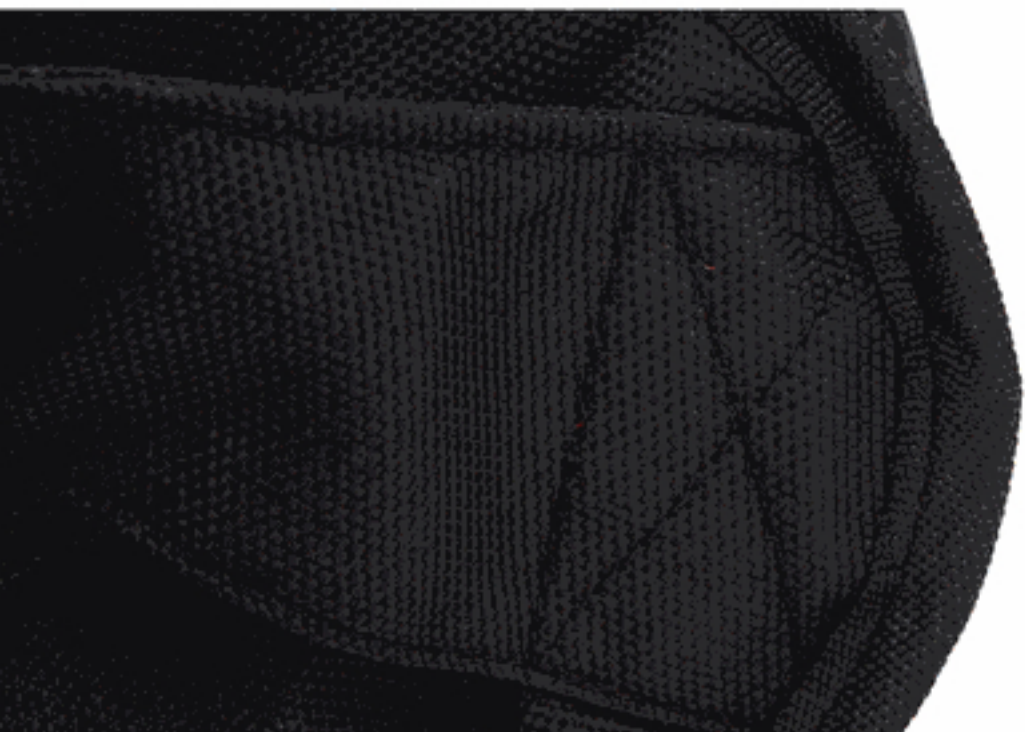

The waist adjustable waistband and buckle can effectively avoid the violent shaking of the bag body caused by walking. It can be adjusted according to itself.

The shoulder strap is reinforced with hundreds of needles bar-tack and sewn by professional bar-tack machine, which is more firm than ordinary car lines.

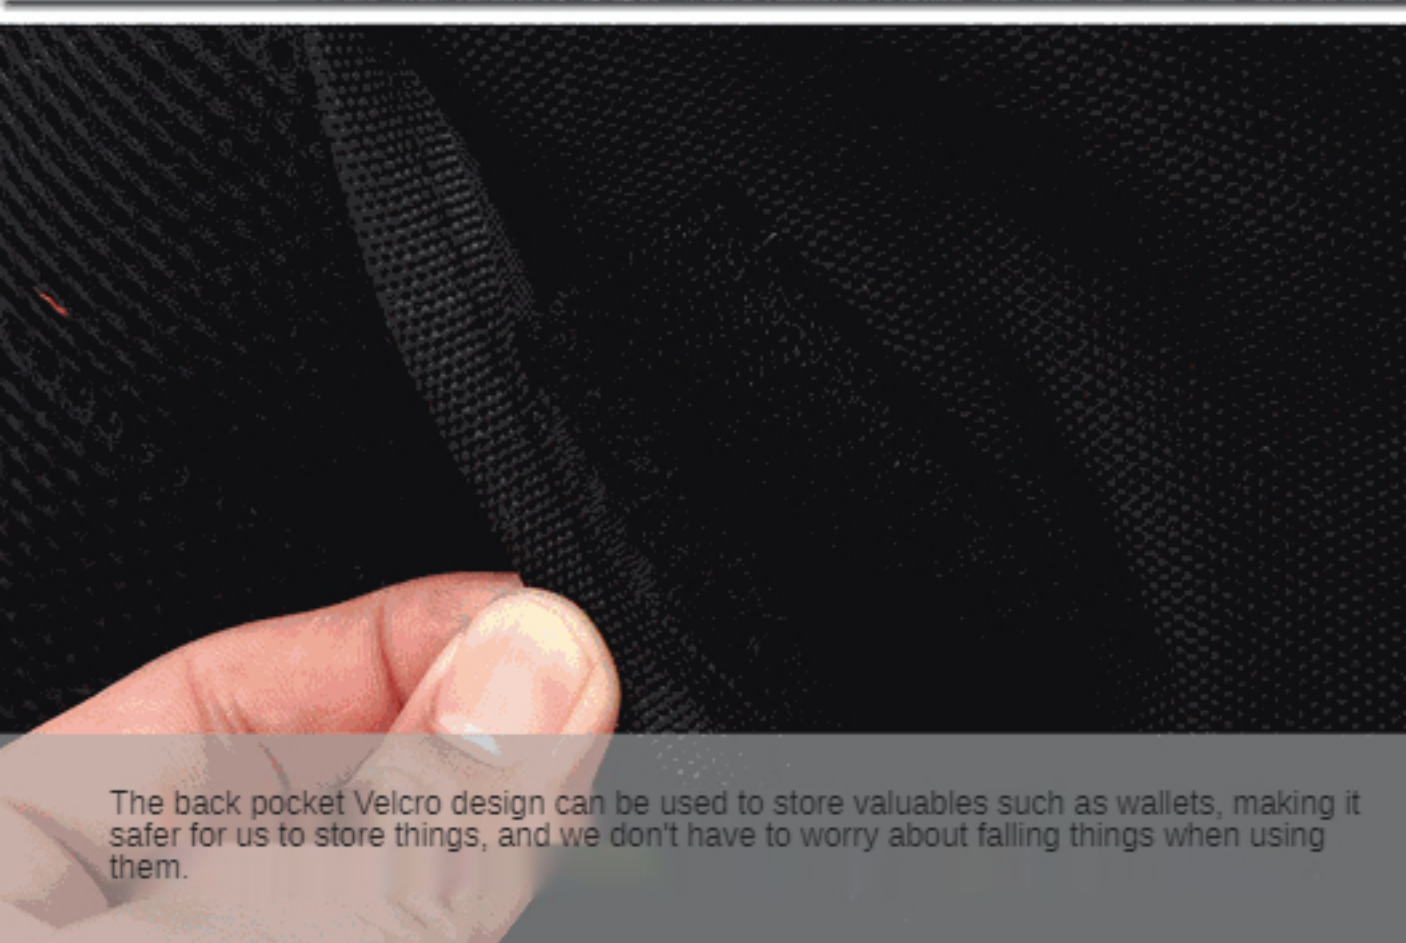

Several times more load-bearing

The tail of the shoulder strap is crossed to reinforce the car line, and each stressed part passes through professional bar-tack, crossing Reinforcement, not easy to break or break

The perfect combination of high-quality zipper and high-grade nylon fabric highlights brand value zipper pull and smooth, durable

The back pocket Velcro design can be used to store valuables such as wallets, making it safer for us to store things, and we don't have to worry about falling things when using them.

The design of the tripod position at the bottom of the backpack is convenient to use, which increases the use space of the backpack. The adjustable buckle design is more convenient.

Internal display

Overall display
